AQSA MUHAMMAD YAHYA

Frontend Developer

Lahore, Pakistan | aqsamuhammadyahya@gmail.com | 0324-6268545 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Final-year Software Engineering student at Virtual University of Pakistan (7th semester, 3.83 CGPA) with hands-on experience building and deploying responsive web interfaces using HTML, CSS, JavaScript, and React. Comfortable with Figma for UI design and Git/GitHub for version control. Seeking a frontend developer internship to apply and grow these skills in a real-world team.

TECHNICAL SKILLS

Languages & Markup: HTML, CSS, JavaScript

Frameworks & Libraries: React.js

Design: Figma

Tools: Git, GitHub

PROJECTS

Café Aqsa — Online Coffee Shop — *HTML, CSS, JavaScript* GitHub ↗

- Built a multi-page coffee shop site with a searchable, filterable, and sortable menu across 3 categories (Espresso, Milk-Based, Specialty).
- Implemented account creation and a "buy 9, get 1 free" rewards system using localStorage for persistent client-side state with no backend.
- Structured the site across 10+ linked pages (products, blog, recipes, brewing guide, FAQ, order tracking) and deployed live via GitHub Pages.

Apna Tailor — *React.js* Live Demo ↗

- Building a dress-customization concept where users mix and match necklines, sleeves, daman, and fabric across 1000+ combinations.
- Integrated a generative AI API to render a live design preview image from user selections, generating a tailor-ready design card with full specifications.

Kanban Task Manager — *HTML, CSS, JavaScript* Live Demo ↗

- Built a drag-and-drop task manager with priority tagging and localStorage persistence, supporting 3 task states (To Do, In Progress, Done) with zero data loss on refresh.
- Deployed and published the project on GitHub as a standalone, dependency-free JavaScript app.

EDUCATION

BS Software Engineering — Virtual University of Pakistan

Currently in 7th semester | CGPA: 3.83 (through 6th semester)

CERTIFICATIONS

- React — Coursera
- Foundations of Project Management — Google (Coursera)
