AQSA MUHAMMAD YAHYA

Full-Stack Developer | React, Next.js, PostgreSQL, AI Integrations

Lahore, Pakistan aqsamuhammadyahya@gmail.com +92 324 6268545
LinkedIn | GitHub | Portfolio

SUMMARY

BS Software Engineering student (CGPA 3.83) building full-stack web apps with React, Next.js, PostgreSQL and MongoDB, and adding AI features through the Gemini API and chatbots. Seeking a remote internship or junior full-stack role.

TECHNICAL SKILLS

Frontend React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3

Backend & Databases PostgreSQL, Prisma ORM, MongoDB, Mongoose, REST APIs, NextAuth, Netlify Functions

AI Google Gemini API, Generative AI APIs, Chatbot Development

Tools Git, GitHub, Figma, Cloudinary, Mapbox, Vercel, Netlify

PROJECTS

TaleemPk *AI study platform for board students* IN PROGRESS — GitHub

Tech Next.js 15, React 19, TypeScript, Tailwind CSS v4, PostgreSQL, Prisma, Gemini API

- Building an EdTech platform for Matric and Intermediate students with an AI PDF workspace that turns uploaded chapters into short notes and MCQ quizzes using the Gemini API.
- Developing a BISE exam hub and a PostgreSQL-backed progress tracker with marks entry and performance reports.

PropertyPulse *Full-stack real estate platform* IN PROGRESS — GitHub

Tech Next.js 14, React, MongoDB, Mongoose, NextAuth, Cloudinary, Mapbox, Vercel

- Building a platform to browse, search and manage property listings, with NextAuth authentication, MongoDB data models and REST API routes.
- Adding Cloudinary image uploads, Mapbox maps, bookmarking and a user messaging system.

Apna Tailor *AI dress customization app* — Live Demo | GitHub

Tech React.js, Generative AI API, Netlify Serverless Functions

- Built and deployed an app with 1,000+ style combinations (necklines, sleeves, daman, fabric) and a custom style library.
- Integrated a generative AI API through a serverless function to render real-time front and back design previews from text descriptions.
- Added downloadable design cards with fabric, color and specifications for tailors.

Café Aqsa *Online coffee shop* — Live Demo | GitHub

Tech HTML, CSS, JavaScript, localStorage

- Built a 10+ page site with a searchable, filterable, sortable menu and a client-side "Buy 9, Get 1 Free" loyalty system.

Kanban Task Manager *Drag-and-drop task board* — Live Demo | GitHub

Tech JavaScript, CSS3, localStorage

- Built a task board with priority tags across three workflow states and localStorage persistence.

EDUCATION

BS Software Engineering Virtual University of Pakistan — **CGPA 3.83 | 7th Semester**
